

# WHAT'S ETWINNING?

eTwinning is a free online community for schools in Europe and some neighbouring countries, which allows you to find partners and collaborate on projects within a secure network and platform.

# *Who can collaborate in eTwinning?*

Teachers can search for other registered eTwinners and schools, connect with them and follow their activities.

Through eTwinning Live teachers can create their own projects in which they can set off activities on different topics by collaborating with two or more teachers and their students.

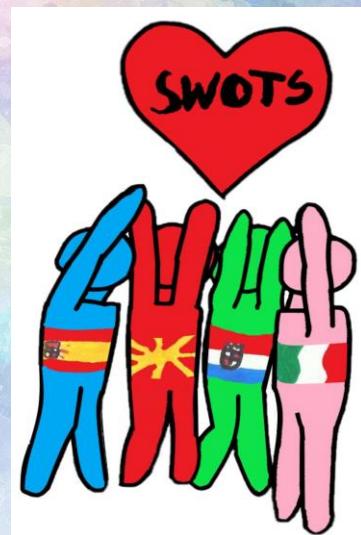

Teachers can find online professional development opportunities that eTwinning offers at European level.

Learning Events are short, intense and enjoyable courses that introduce teachers to a topic, stimulate ideas, and help them develop their skills. Teachers can also join eTwinning Groups – virtual places where eTwinners meet and discuss specific subjects, topics or other areas of interest.

# What's the TwinSpace?

TwinSpace is the place for the eTwinning project members where **planned activities** are developed. **Students and teachers** are the main users of TwinSpace; they can contribute depending on their access profile. These are **collaboration activity pages** where the project partners have taken part.

The project coordinators' imagination and a proper initial planning of both the project and the tasks are factors to guarantee that students will be involved from the start in their common work.

# 4.- When did I start using eTwinning?

We started using eTwinning this year because our english teacher is in Erasmus+ project, and we had to create a profile.

It was so easy using the app because it is very simple to use.

It is designed to include those people who are not registered in the eTwinning platform, which allows students, parents or teachers working in the project to see what is happening.

TwinSpace is the place for the project members, the space where planned activities are developed. Students and teachers are the main users of TwinSpace; they can contribute depending on their access profile.
